Office Action Summary

Art Unit: 1774

1. Claim 12 and 17 are again objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

2. Claims 1, 6-11 and 14-16 are again rejected under 35 U.S.C. 103(a) as being unpatentable over either of the patents to Kasahara et al. or Ohbayashi et al. in view of Waller et al. for the reasons of record

The fact that the primary references have been modified for a reason (i.e., control of pigment reception as taught by Waller et al.) different from that of applicants is not dispositive of the issue of patentability of the present article claims. Control of pigment reception in the recording elements of the primary references would be desirable to one of ordinary skill in this art.

3. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
